                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 13, Application US/07842165

Sequence 13, Application US/07842165

Patent No. 593269

GENERAL INFORMATION:

APPLICANT: DUBGIS, Michel

APPLICANT: DUBGIS, Michel

APPLICANT: DUBGIS, Michel

APPLICANT: DIGGIAN; Alain

TITLE OF INVENTION: Recombinant gene coding for a protein

TITLE OF INVENTION: having endochitinase activity or for a precursor thereof.

NUMBER OF SEQUENCES: 15

CORRESPONDENCE ADDRESS:

ADDRESSE: FOLEY & LARDNER

STREET: King Street Station, Suite 500, 1800 Diagonal
